# PREFACE.

# PREFACE.

In presenting the second volume of the Lineage Book I feel impelled to say the importance of the publication of these records by the National Society of the Daughters of the American Revolution has continually grown upon me. A single paper is of small moment save to the individual member whose title it establishes, but if you continue to send out these volumes they will furnish the country a complete index of the War of the Revolution. Each hero is traced to his locality, and through your aid earnest students will be guided in making closer studies; bringing out characteristics; rehabilitating heroic deeds and perpetuating local incidents. You are spreading as upon a map the personnel of the struggle for American independence. The oneness of purpose—the coöperation from the beginning—the sacrifice, the generosity, the organization in each colony and each section is vividly portrayed and the lesson herein learned can but stimulate patriotism. The daily life, habit of thought, and moral attitude are made familiar. You invite the people not only to walk over battlefields but to sit beside the hearth-stones; not only to shake hands with the sires, but to bend reverently before the mothers. You cause us to realize that every soldier went from a home and had the life strength of a home to nerve his purpose; thus with filial piety you place on a pedestal the noble women of the American Revolution.

The labor of this work cannot readily be understood; how the weariness of repetition, the perplexity of detail and the demand for accuracy has continually retarded progress. The early applications were necessarily complicated and inaccurate. Our faithful Registrars were not supplied with books of refer-

ence, and many claims were difficult to verify. It was a serious undertaking to reconcile family legend and history. In the future the difficulties must continually diminish, because the office now has a rapidly growing reference library, and applicants better understand how to prove their claims and prepare their papers. Establishing lineal descent in many cases where only collateral claim had been presented has been most interesting, and was often accomplished through papers of relatives who had made later and more careful investigation, but chiefly through historical research.

In preparing this volume the endeavor has been to keep within the required limits. The temptation to introduce anecdote or to enlarge upon events has been resisted, but the demand was imperative for some incident and color in giving the record of so many thousand names. E. B. J.
